7. LENGTH OF OBSERVATION 01 minute		8. NUMBER OF OBJECTS one		9. COURSE NSE	
10. BRIEF SUMMARY OF SIGHTING Witnesses noticed light on the ground and looked up. Roundish, bluish-white light appearing overhead moving ESE until out of sight. One minute total observation time. Aurora very active at time of sighting.				11. COMMENTS Probably a meteor sighting since object traveled through almost 90 deg of arc in one minute. Perhaps some distortion on the time estimate. Sighting too short for auroral display. Object bright enough to cast light on ground, while still at extreme altitude and moving very fast.
